

Software Release Notes: Date

28.01.26

Overview

We are excited to announce the latest release for Olex AI. This update brings a range of new features, quality-of-life improvements, and important bug fixes to enhance your experience. 28 Jan 2026 .

New Features

Exciting News!! We now have a new, faster OCR engine for reading handwritten text with 98% accuracy. [Read more here.](#)

Scanning & upload improvements

- StackScan now accepts completely blank and lined blank pages.
- Upload screens now provide clearer estimates for how long processing will take.
- Warnings are now shown if uploaded images are too large or low quality.
- Handwriting images can now be opened in full size from the assignment screen.
- The SnapSnap triangle icon has been enlarged for better visibility.

Improved document library

- File icons are now smaller and clearer, making the document library easier to browse.
- Updated and refreshed the document library icons for a more modern look.

Terminology Update

- Target Grade” has been renamed to Learning Profile across the platform.

Word document improvements

- Student essays are no longer included when exporting Word documents.
- Teachers can now generate feedback directly into a Word document.

Content moderation & safety

- Teachers can now flag inappropriate content.
- Teachers will receive notifications when content is flagged.
- Inappropriate words are now automatically removed from essays scanned with SnapSnap and OlexReader.

User management & permissions

- Class admins can now reset an individual student’s password from the class page.
- Added extra safeguards when assigning the Trust Leader role.

Assignment & pupil management

- Added an Additional Success Criteria field when setting up assignments.
- Teachers can tag pupils with a Learning Profile.

School & trust controls

- Schools and trusts can now manage SnapSnap settings at their own level.

People & platform improvements

- Improved how the People page displays and filters full names.

Bug Fixes

The following key issues have been resolved in this release:

- Fixed an issue where duplicate schools could be created.

- Fixed a problem where student work was incorrectly flagged as inappropriate after upload.
- Fixed analytics processes that were repeatedly restarting and getting stuck.
- Fixed usage reports so SnapSnap and OlexReader are counted separately.
- Fixed paragraph formatting not being preserved in StoryBooks.
- Fixed an issue where rotating an iPad caused the screen to zoom in unexpectedly.
- Fixed site-wide alerts not appearing unless the cache was manually refreshed.
